Ideal Visibility and Profitability with a Hybrid OR

Modern hybrid ORs give you access to state-of-the-art equipment and solutions for minimally invasive procedures, which support you in executing more complex procedures and enhancing patient outcomes. Trumpf Medical’s TruHybrid™ solutions are focused on cutting-edge technologies and intelligent concepts. Our innovative and customizable solutions enable truly efficient workflows and provide the flexibility you need in your OR. The result: Positive effects in reputation and profitability of your clinical site through optimized throughput in the OR and reduction of total length of stay in the hospital.

"A hybrid OR opens opportunities for a wider range of procedures and, at the same time, significantly enhances outcomes through improved patient safety."

Every hybrid operating room is unique. Together with you, Trumpf Medical evaluates your team’s needs from the very beginning and provides a customized solution that includes integrated OR tables and radiolucent components, as well as, innovative surgical lights and ceiling-mounted supply units. We partner with leading imaging device companies worldwide. Together, our products, services and total solutions open up new opportunities – within your OR and beyond. From cardiac and vascular to neuro and general procedures, our solutions allow for a wide variety of multidisciplinary and flexible utilization of your operating room – enabling a rapid return on investment and heightened profitability.

Safe decision

• By partnering with Trumpf Medical, you will benefit from more than 20 years of experience and best-in-class project management. We will be there for you every step of the way.

• To ensure your investment succeeds and you achieve the ideal room solution, we provide tailored consulting and room planning services prior to actual purchase.

• Our planning software helps you visualize your customized hybrid OR through realistic, to-scale, 3D images and configurations.
Attract More Patients and Surgeons

Trumpf Medical offers innovative technology in OR tables, surgical lights, video systems and ceiling-mounted supply units. Our portfolio of products enhances visibility in intraoperative imaging, enabling your team to perform complex procedures on a wide variety of patients – all while giving you the flexibility to switch between minimally invasive procedures and open surgery.

The centerpiece of a hybrid OR is the imaging system and the surgical table. With an OR system table in your hybrid room, you gain full freedom for use in minimally invasive and interdisciplinary applications. The TruSystem™ 7500 OR System Table provides flexible room usage leading to adaptable scheduling and heightened uptime and, therefore, higher profitability.

TruSystem™ 7500 System Table – Your Advantages at a Glance:

- **Safe patient transfer and optimized workflow** – The tabletop of TruSystem™ 7500 Surgical Table can be easily exchanged with the patient on it by support of a shuttle within the surgical suite.

- **Clear sight and exceptional imaging performance** with the special Carbon FloatLine tabletop – this free-floating tabletop is easy to use and offers up to 82.7” / 2,100 mm radiolucent area, even in Trendelenburg position. A wide range of additional carbon accessories are available for different disciplines and applications (TAVI, AAA, Coiling, Clipping, spinal fusion or brain tumor resections).

- **Easy working environment** through integration with the imaging devices and feedback messages for the user.

Equip Your OR with Intelligent and Integrated Technology

A well-designed hybrid OR is critical for flexible utilization and efficient workflows. Our intelligent surgical lights, video systems, and modular ceiling-mounted supply units provide adaptable, ergonomic solutions – regardless of the placement of your imaging devices.

iLED™ 7 Surgical Lights and TruPort™ Supply Units – Your Advantages at a Glance:

- **Intelligent lighting** with an automatic lighting management system that uses the latest 3D sensor technology to continuously analyze the surgical site. By interpreting the conditions, the light automatically adapts and eliminates the need for manual adjustment. In addition, an innovative shadow management system compensates for unwanted shadows automatically.

- **Flexible and modular architecture** of TruPort™ Supply Units offer you the flexibility to accommodate various room sizes with a long reach and high load capacity. They are simple and intuitive to use and can be easily customized at any time – now or in the future. This allows you to design your own workstations with accessories, including large monitors, in your hybrid OR and other departments in the hospital.

- **Free working environment** due to long-reach of both the ceiling-mounted supply units and surgical light arms.
Leasing and Rental Equipment
We provide a range of attractive leasing and rental offers to ensure you get the technology you need at the right terms.

Installation and Implementation
Once on-site for installation, we will manage the implementation of our products and work seamlessly with our partners and your facility to ensure the complete hybrid OR solution exceeds your expectations.

Training
Our training program is comprised of courses that can be individually combined to ensure you get the most out of your investment.

Technical Service
We deliver regular maintenance and inspection services along with customized add-on service packages to ensure your hybrid OR runs efficiently and effectively in order to continuously deliver optimal performance.

Professional Care
Our comprehensive Trumpf Medical service portfolio guarantees maximum availability and scope of function. We maintain your products, add new options on request, and provide you and your employees with valuable expertise in workshops and training courses.
